Kanban Boards & Projects in GitHub

Data Science Bootcamp

NASHVILLE SOFTWARE SCHOOL

Objectives

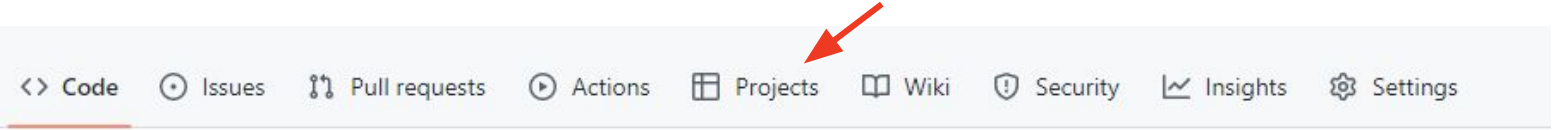
1. Be able to create a Project Kanban Board in GitHub
2. Be able to create, assign, and update the status of issues (cards) in a GitHub Kanban Board

Kanban Board Refresher

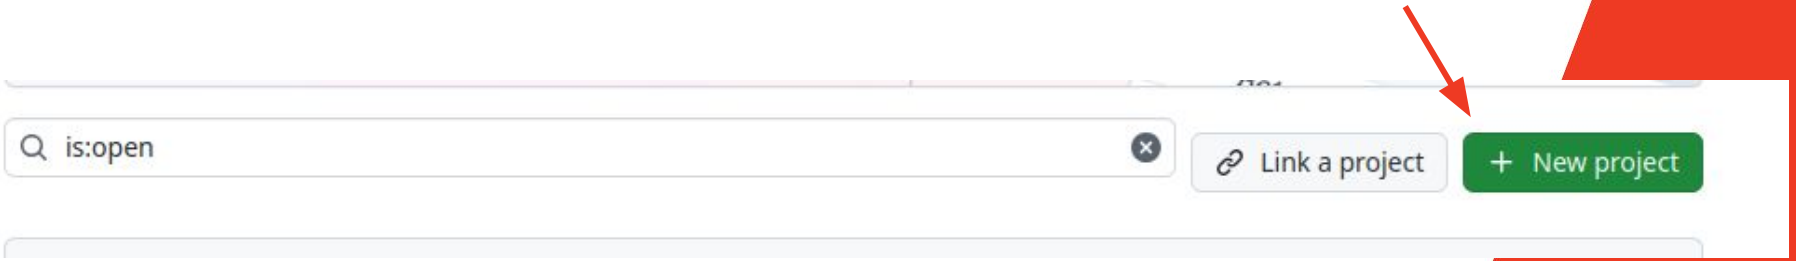
- Kanban boards are used to keep track of who is working on what within a team
- They provide an easy visual to see what stage each task is in with a quick a glance
- Cards/issues/tickets are assigned and then moved through the different stages: To Do, In Progress, In Review, Done

Setting Up a Kanban Board in GitHub

1. Start by navigating to the repository the Kanban Board will relate to. For this class, this means the team repository for the project you are working on.
    - Only one person for each team should create the board so that all work for the project can be easily visible to everyone.
2. Once in the repository, click on the “Projects” tab

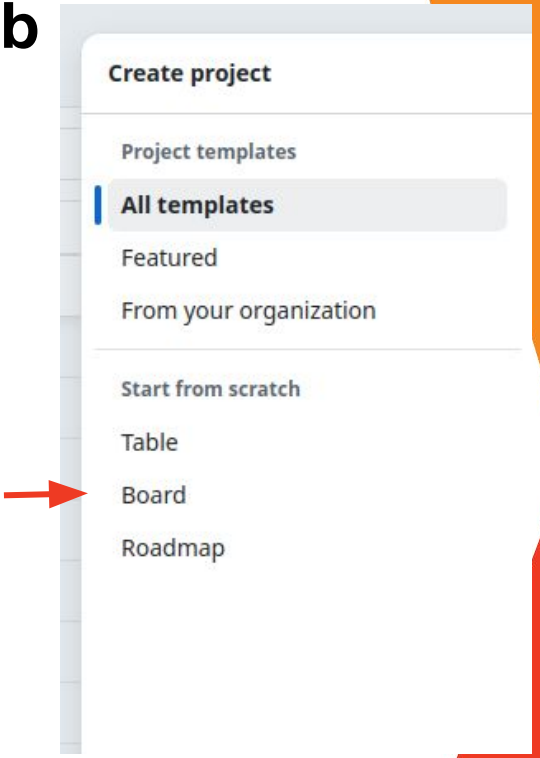


3. On the “Projects” tab, click “New project”



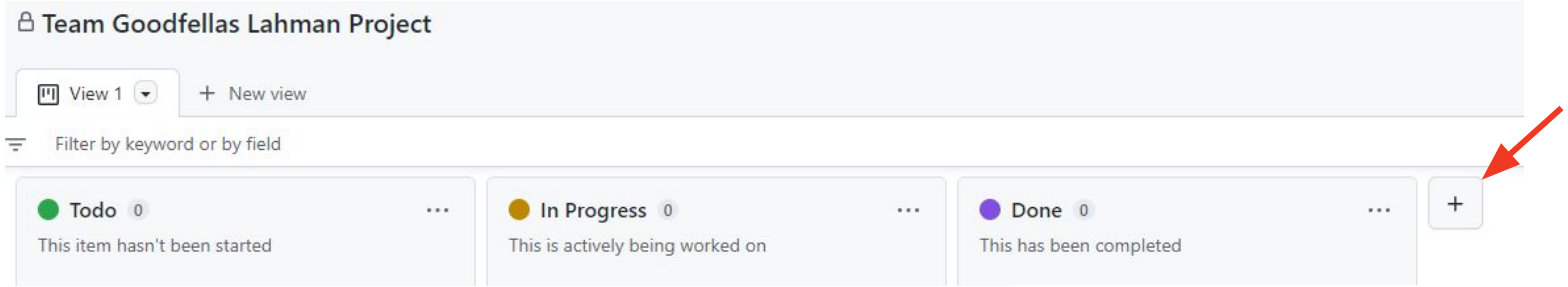
Setting Up a Kanban Board in GitHub

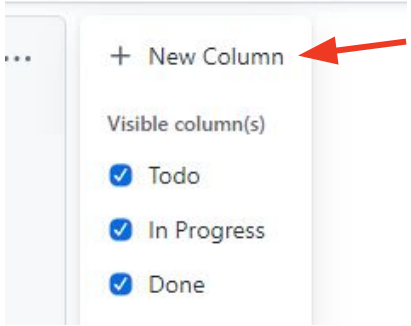
4. Select “Board” on the left. Then name your project and click “Create”



Setting Up a Kanban Board in GitHub

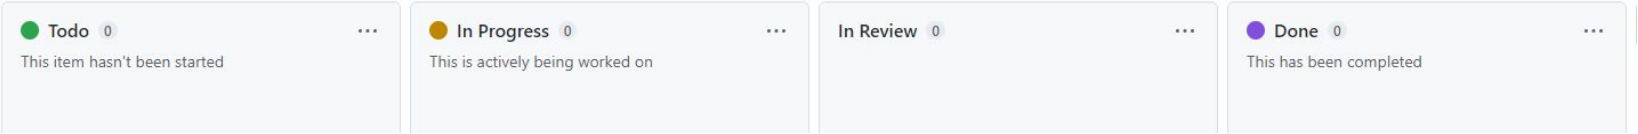
7. The board defaults include 3 columns, Todo, In Progress, and Done, but we want to add a column for In Review. Click the "+" to the right of the Done column, then select "New Column", name it "In Review", and drag it to the left of the Done column



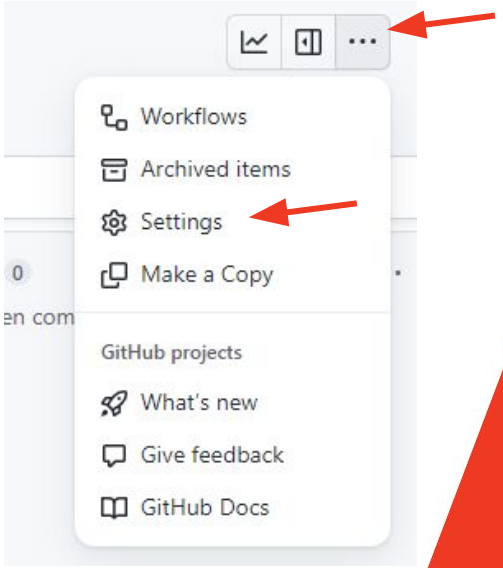


Setting Up a Kanban Board in GitHub

Your Kanban Board should now look like this:

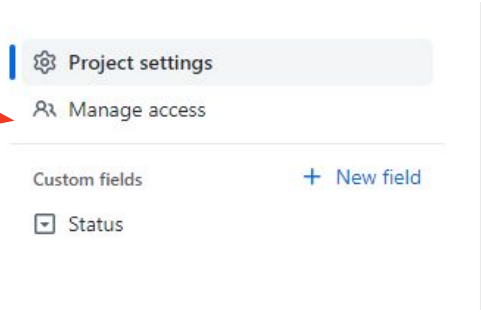


8. Now you need to add your teammates to the board. Click on the ellipsis (...) at the far right and select “Settings”

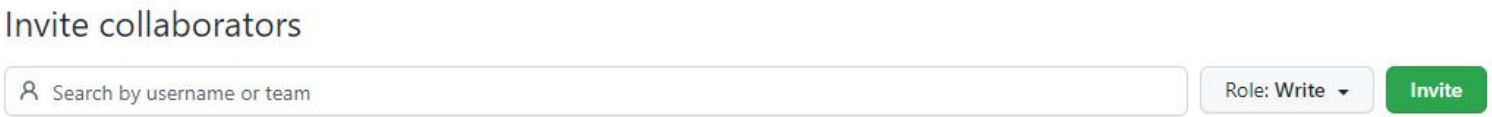


Setting Up a Kanban Board in GitHub

9. On the setting page, select “Manage access” from the menu on the left



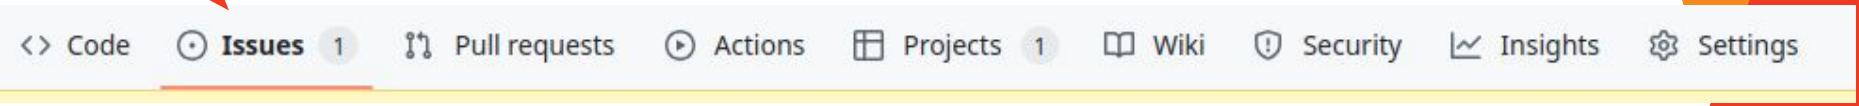
You will see this field in the middle of the page:

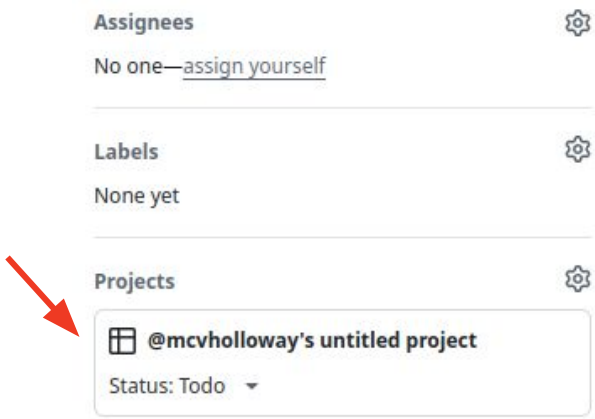


10. Begin typing your teammates’ usernames, then click on them when they pop up. Once you’ve selected all of them, click “Invite”.

Setting Up a Kanban Board in GitHub

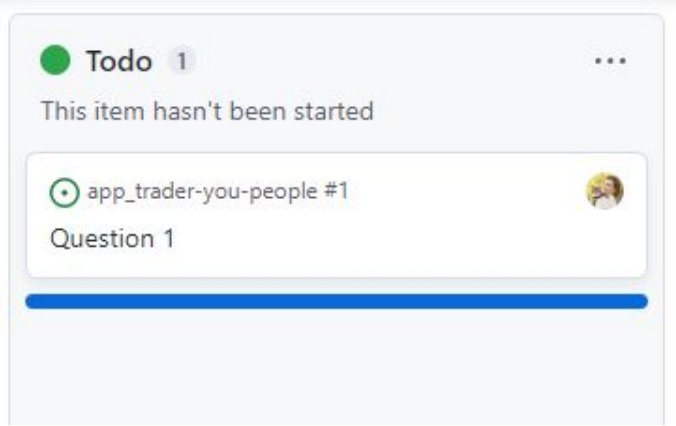
11. Now it's time to add tasks - they're called "Issues" in GitHub. Go back to the repository for the project. Click on the Issues tab at the top. Give a name to the issue and select your project under Projects on the right side.





Setting Up a Kanban Board in GitHub

Once the issue (task) is created and assigned, you will see it under the Todo column. Make sure to move it to the correct column as you begin to work on it (In Progress) and complete your work on it (In Review).



You can easily return to the board from your team's repository by clicking on the "Projects" tab and then clicking on the Project/Board name
